## PROFESSIONAL SUMMARY

Frontend Developer with 5+ years of experience building scalable web applications with React.js, TypeScript, Next.js, and Node.js for enterprise clients in financial services, FMCG, and e-commerce. Built 3 custom Spotify Backstage plugins for an internal developer platform used by 75-100 developers, cutting template creation time by around 75%, and reduced initial page load time by up to 40% through performance optimization. Skilled in reusable component architecture, unit testing with Jest and React Testing Library, CI/CD with GitHub Actions, and mentoring junior developers.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3

**Frameworks and Libraries:** React.js, Node.js, Express.js, Redux, React Query, Material UI, Tailwind CSS, Bootstrap

**Developer Platforms:** Spotify Backstage (frontend and backend plugins), Internal Developer Platforms (IDP)

**Testing:** Jest, React Testing Library, Unit Testing, Test-Driven Development (TDD)

**CI/CD and Tools:** Git, GitHub, GitHub Actions, Docker, Webpack, Vite, npm, Yarn, GitHub Copilot

**Practices:** REST API Integration, Responsive Design, Web Accessibility (WCAG 2.1), Performance Optimization, Core Web Vitals, Cross-Browser Compatibility, Code Reviews

## PROFESSIONAL EXPERIENCE

**Frontend Developer | Tata Consultancy Services (TCS)** *Aug 2021 - Present*

Pune, Maharashtra, India | Official designation: System Engineer

- Promoted twice (Graduate Trainee to Assistant System Engineer to System Engineer) while delivering frontend applications for 3 enterprise clients across financial services, FMCG, and e-commerce.
- Mentored 4-6 junior developers and led code reviews in teams of 5-10, establishing frontend coding standards and best practices.

***Client: Financial Services and Insurance | Platform Engineering Team*** *2025 - Present*

- Built 3 custom Spotify Backstage plugins (frontend and backend) from scratch using React.js, TypeScript, and Node.js for an internal developer portal used by 75-100 developers.
- Designed and delivered an end-to-end template creation workflow, including dynamic template discovery, REST API integration, routing configuration, and schema-driven multi-step forms generated automatically from API responses, cutting template creation time from about 10 minutes to 2-3 minutes (around 75% faster).
- Developed a custom template plugin that lets engineers create templates for AWS, Azure, and GCP and submit them through an administrator approval workflow, standardizing how new templates are provisioned.
- Redesigned the plugin UI and built 10+ reusable React components (multi-step form with progress bar, form summary panel, pagination, header, footer, and API-validated form inputs) and a shared color theme using Tailwind CSS and Material UI, now adopted as the standard for every new plugin.
- Wrote unit tests with Jest and React Testing Library for reusable components and critical UI flows, maintaining 70-80% test coverage and reducing regressions.
- Set up and maintained CI/CD pipelines with GitHub Actions to automate build, test, and deployment workflows, and used GitHub Copilot to speed up development.

***Client: Fast-Moving Consumer Goods (FMCG) | Internal Enterprise Platform*** *2024 - 2025*

- Developed frontend features for an internal enterprise platform that unified 9 separate applications, using React.js, TypeScript, and Material UI.
- Reduced initial load time by up to 40% through lazy loading, code splitting, and memoization, with measurable improvements in Core Web Vitals.
- Managed application state and server data with Redux and React Query, and wrote unit tests with Jest and React Testing Library for key application features.

***Client: Food and Beverage Wholesale Distribution (North America) | E-commerce*** *2021 - 2024*

- Built and maintained features for a customer-facing e-commerce website and an internal web application using React.js, TypeScript, Node.js, and Material UI.
- Integrated REST APIs and developed Node.js middleware to connect the frontend with backend services.
- Delivered responsive, cross-browser, and accessible (WCAG 2.1) interfaces in collaboration with UI/UX designers and business stakeholders.
- Diagnosed and resolved critical frontend production issues, maintaining reliable releases for the client.

## PROJECTS

**JobScout - Real-Time Job Aggregator** | React.js, TypeScript, Redux, Node.js, Express.js, Python
GitHub: github.com/adikharadkar/JobScout-Real-Time-Job-Aggregator

- Built a full-stack job aggregator that collects real-time job listings from multiple job portals based on role and location, removing the need to search each platform separately.
- Implemented a Python web scraping service with BeautifulSoup and Requests to extract and structure job data from external websites.
- Developed a Node.js and Express.js REST API that connects the React frontend to the scraping service, handling request routing, data transformation, and response formatting.
- Built a responsive React.js and TypeScript search interface with Redux state management to display aggregated results in a clean, structured layout.

## EDUCATION

**Bachelor of Science (B.Sc.) in Computer Science** *Jun 2018 - Apr 2021*
Dr. Babasaheb Ambedkar Marathwada University, Chhatrapati Sambhajinagar, Maharashtra | Percentage: 77.57%

## TRAININGS & CERTIFICATIONS

**Elements of AI** - University of Helsinki *Oct 2026*
**Introduction to Generative AI** - Google *Sep 2026*
**Frontend Developer (React)** - HackerRank *Sep 2024*
**Frontend Engineer** - Codecademy *Jul 2024*
**Namaste React** - NamasteDev.com *Jul 2024*
